"The woods and the hills are a part of God's handiwork.—From this play you may, in some measure feel their influence.—My play is the story of a man who took the trail that leads to the lower ground, and a woman, and how she found her way to the higher sunlit fields."—Harold Belle Wright.

### INTEREST IN SULPHUR.

University to Investigate Culberson County Deposits.

Austin, Texas, Nov. 2.—The sulphur deposits of Culberson county will be investigated immediately by University of Texas experts sent out by the bureau of economic geology and technology for the purpose of determining the extent of the deposits and their probable value. The prevailing high price of sulphur due to the war has stimulated interest in this region. Part of the land upon which the sulphur occurs is owned by the University of Texas. Dr. Emil Boese and E. L. Borch of the university bureau have gone to Rustler's Springs, a ranch 40 miles from Orla, to begin their survey. The deposit is found in the surface shale and gypsum of the Permian formation, and is about 40 miles long and 20 miles wide. One company has already been organized to develop the sulphur and is producing about eight tons per day. As soon as the investigation has been finished a complete report on the region will be prepared by the bureau of economic geology and technology.

### CHINESE EGGS.

Ever since the hens of John Chinaman began laying eggs for the American breakfast table, everything except "near-by henner" or special "nest-to-table" brands have been open to suspicion. Now Yankee business thrift is undertaking to have the Chinese hen compete for American honors in the field of "processed" eggs. A Boston concern has recently completed an egg preserving plant in Shanghai, China, which has started in to handle 300,000 eggs daily. The eggs are either frozen or dried, then shipped to the American trade via the Pacific coast in "scrambled" form. These eggs enter into competition with American eggs for bakery and confectionery use. These Chinese eggs are bought for about one-half cent each, and are processed by American machinery "manned" by about 200 Chinese employees, one-half of whom are girls. Chinese men candle about 16,000 eggs apiece a day by using electric light candling outfits. Chinese girls can break and examine 3,000 eggs apiece daily, and receive \$5 a month for their work.

The lesson in this for American poultrymen is to let the foreigner have the bakery and confectionery trade, and use every ounce of energy in developing the American taste for the strictly fresh fancy flavor of near-by laid eggs. The person who becomes a breakfast egg epicure doesn't know how to begin his day without this first aid to the hungry.—Farm and Fire-side.

### HUGHES WOMEN EGGED.

Chicago, Nov. 2.—The women who are touring the country on the Hughes transcontinental train met opposition at a theater meeting here Wednesday. Derisive jeers interrupted the speakers and began the heckling which culminated when eggs were tossed at them as they left the theater by an alley exit and passed into waiting automobiles. None of the eggs struck the women.

### Fried Fish

Fry perch, trout, butter fish, smelt, herring and other small pan fish whole. Cut large fish in inch thick slices, and two or three inches square; flunders and bass, strip off the flesh each side of bone in long fillets, divide in halves and roll up toward tip. Remove skin and bones as much as possible from sliced fish; wipe dry, roll in bread crumbs or fine meal, then in beaten egg and then in crumbs and fry in deep Cottolene, but enough to brown a bit of bread while you count sixty. Drain well before serving. Or simply cover with seasoned meal and brown on each side in hot Cottolene in frying pan.
